Software Engineer & Typescript Backend Web Developer by passion and profession, with years of experience in websites, web apps, and web services development. Working mainly with the Javascript ecosystem (**specializing in Node.js Backend Development**), and focusing on delivering high quality solutions by following as many web development best practices as possible. Always excited about learning new and developing current soft and technical skills, both on the professional and personal levels.

Work Expertise

Typescript · Node.js · NestJS · Prisma · MongoDB · React.js · REST API · Jest · GitHub

Work Experience

Intermediate Backend Javascript Developer @Combyne Ag | Remote, Canada [MAR 2023 - MAR 2024]

- With the help of 2 teammates, build Combyne Connect API from scratch using NestJS
- Write unit, integration and e2e tests for Combyne Connect API using Jest
- Write documentation for Combyne Connect API using Swagger
- Writing “black box” automated test for Combyne Connect API using Mocha and Chai

Key achievement

- ✓ Build from scratch and deploy the first version of Combyne Connect API

Main technologies used at Combyne Ag

Typescript · Node.js · NestJS · Prisma · AWS Cognito · Swagger · Jest · REST API · GitHub

Fullstack Web Developer @YASSIR (YC W20) | Remote, Algeria [MAR 2022 - FEB 2023]

- Develop new features and fix bugs on the “Referral” project using Express.js
- Write documentation to help new developers integrate quicker into the team
- Write automated tests for the REST API using Postman
- Participate in the technical recruitment process of new developers

Key achievements

- ✓ Push the “Referral” project’s advancement status from 50% to 80% completion
- ✓ Successfully hire 3 Node.js backend developers

Main technologies used at YASSIR (YC W20)

Typescript · Node.js · Express.js · MongoDB · Mongoose.js · Swagger · REST API · GitHub

Javascript Developer @Data Impact | Remote, Algeria [SEP 2021 - JAN 2022]

- Work with legacy Javascript code to maintain a proper execution of the dashboard
- Help Product Owners detect bugs and fix them while cleaning the code
- Participate in releases to the pre-production and production environments

Key achievements

- ✓ Detect a hidden bug messing up the dashboard’s calculations, and fix it
- ✓ Successfully hire 1 Javascript developer

Main technologies used at Data Impact

Javascript ES6 · Git · BitBucket
